

| MEMORIA RAM ADATA DDR4 2666MHZ 8GB NON-ECC CL19 |  |
|-------------------------------------------------|--|
| Especificaciones                                |  |
| Detalles tecnicos                               |  |
| Sustainability certificates                     |  |
| RoHS                                            |  |
| Memoria                                         |  |
| Latencia CAS                                    |  |
| 19                                              |  |
| Diseno de memoria (modulos x tamano)            |  |
| 1 x 8 GB                                        |  |
| Componente para                                 |  |
| PC/servidor                                     |  |
| Voltaje de memoria                              |  |
| 1.2 V                                           |  |
| Configuracion de modulos                        |  |
| 1024M x 16                                      |  |
| Buffered memory type                            |  |
| Unregistered (unbuffered)                       |  |
| Tipo de memoria interna                         |  |
| DDR4                                            |  |
| Memoria interna                                 |  |
| 8 GB                                            |  |
| Velocidad de memoria del reloj                  |  |
| 2666 MHz                                        |  |
| ECC                                             |  |
| No                                              |  |
| Otras caracteristicas                           |  |
| Factor de forma                                 |  |
| 288-pin DIMM                                    |  |
| \$245.60MN                                      |  |
